## **Election Results**

Election results are produced after the election is closed to ensure secrecy of the votes. The UAGMNE committee chair will monitor voter participation during the day.

The vote results will be available when the election is complete. The system will update the status to FINAL after closing time at 6:00 PM. Should any voters remain in the system as of 6 PM, they will be able to complete their voting activity until 10 minutes past the hour. Voters will not be able to log on at any time after 6 PM. Once the event is updated, the committee will be provided with a Vote Count Summary report.

Before any results are communicated to the membership, the committee will need to determine if any paper ballots (sequestered votes) need to be added to the count. These are only members whereby the committee need to confirm their eligibility to vote.

Members will be notified of the results through e-mail via staff reps and on the TSU website. Candidates will be notified immediately prior to the results being posted to the membership so they are aware of the results. The candidate's scrutineer can also notify their candidate when the results are finalized.
